Use Skype on a Wireless-G Phone!

Get wireless handset convenience when you use Skype! Now when you want to talk to your friends you don't need your computer because the Skype application is pre-loaded on the Wireless-G Phone. The Linksys Wireless-G Skype Phone comes with the Wireless-G Phone and charger and is already pre-loaded with Skype. You are now free to use Skype anywhere you have wireless Internet access. Just select who you want to talk to from your contact list on your color display and get ready to talk.

Of course, the Wireless-G Phone supports SkypeOut dialing and rings when you have a Skype or SkypeIn call coming in, displaying the caller's ID on the screen. The Wireless-G Phone also supports call waiting and Skype's optional Voicemail service. You also have the ability of specifying your Skype status by signaling to others whether you're available to talk. Set your Skype status to let other Skype users see if you're online, busy or not available.

In short, the Linksys Wireless-G Skype Phone allows you to make calls to other Skype users from anywhere you have wireless Internet access. You'll get the convenience of a wireless handset and all its features, plus the high-quality voice reception integrated right into your Skype phone, no computer is required!

iPhone® - More Than Talk. The iPhone family of handheld devices harness the power of the Internet to deliver more than talk.	Use Skype wherever you have wireless Internet access	Power up your Wireless-G Phone and sign in to Skype, you don't need a computer	Make free calls to other Skype users
